

AbbVie Clinical Pharmacology Research Unit
Information Sheet
 www.abbviephase1.com

Check In: Wednesday, January 30, 2019

Study drug and design:

AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority, and is not currently available on the market. The objective of this study is to compare the safety, tolerability, bioavailability and pharmacokinetics (the amount of drug absorbed by the body into your blood stream and how your body handles the drug) of single doses of 2 different formulations of the study drug.

Minimum Subject Selection Criteria:

YOU may be eligible to take part in this clinical study if you meet the following conditions:

- ◆ Healthy women up to 70 years old.
- ◆ Females must be postmenopausal for 1 year.
- ◆ Average weight for height BMI 18 to 29 kg.
- ◆ Not taking any medications or herbal remedies or supplements.
- ◆ No history of gastrointestinal surgical operations including removal of the gallbladder.
- ◆ No history of any drug sensitivity or allergy.
- ◆ No history of drug or alcohol abuse for 12 months.
- ◆ Non-user of tobacco for at least 6 months.
- ◆ No blood or blood product donation after December 04, 2018.
- ◆ No other study participation after December 18, 2018.
- ◆ Must be 6 weeks away from last first in human study.
