

AbbVie Clinical Pharmacology Research Unit
 Information Sheet
 www.abbviephase1.com

Check In: September 4, 2019

Study drug and design:

AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority, and is not currently available on the market. The objective of this study is to compare the bioavailability (the amount of drug absorbed by the body into the blood) when comparing the investigational drug with different formulations when given with food and fasting.

Minimum Subject Selection Criteria:

YOU may be eligible to take part in this clinical study if you meet the following conditions:

- ◆ Healthy men and women 18-55 years old.
- ◆ Females must be permanently surgically sterile or postmenopausal for 1 year.
- ◆ Average weight for height (BMI ≥ 18.0 to ≤ 29.9 kg/m²).
- ◆ Not taking any medications or herbal remedies or supplements.
- ◆ No history of gastrointestinal surgical operations including removal of the gallbladder.
- ◆ No history of any drug sensitivity or allergy.
- ◆ No history of drug or alcohol abuse for 6 months.
- ◆ Non-user of tobacco for at least 6 months.
- ◆ No blood or blood product donation after July 9, 2019.
- ◆ No other study participation after July 23, 2019.
- ◆ Must be 6 weeks away from last first in human study.
