

AbbVie Clinical Pharmacology Research Unit
Information Sheet
 www.abbviephase1.com

Check In: Thursday, September 19, 2019

Study drug and design:

AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority, and is not currently available on the market. The objective of the study is to determine the bioavailability (the amount of drug absorbed by the body into the blood) when comparing the study drug of two different formulations and assess the safety, tolerability and pharmacokinetics (the amount of drug absorbed into your blood stream and how your body handles the drug).

Minimum Subject Selection Criteria:

YOU may be eligible to take part in this clinical study if you meet the following conditions:

- ◆ Healthy women 18-65 years old.
- ◆ Females must be permanently surgically sterile or postmenopausal for 1 year.
- ◆ Average weight for height (BMI 18 to 29.9).
- ◆ Not taking any medications or herbal remedies or supplements.
- ◆ No history of gastrointestinal surgical operations including removal of the gallbladder.
- ◆ No history of any drug sensitivity or allergy.
- ◆ No history of drug or alcohol abuse for 12 months.
- ◆ Non-user of tobacco for at least 6 months.
- ◆ No blood or blood product donation after July 25, 2019.
- ◆ No other study participation after August 19, 2019.
- ◆ Must be 30 days away from last first in human study.

Screenings at ACPRU in Grayslake
with additional limited screening appointments available at:
University of Illinois Rockford Campus

Screening dates: *(To find out if you are suitable to take part in this clinical study)*
