

AbbVie Clinical Pharmacology Research Unit

Information Sheet

www.abbviephase1.com

The health and safety of volunteers and employees is our priority. We have safety protocols in place to keep the unit as safe as possible.

Check In: Wednesday, October 06, 2021

Walnut

Study drug and design:

AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority, and is not currently available on the market. The objective of this study is to compare bioavailability (the amount of drug that is absorbed by the body into the blood stream) of different granule formulation in healthy subjects under fasting conditions. In addition, you will be asked on how well you like or don't like the taste of coated granules compare to uncoated granules.

Minimum Subject Selection Criteria:

YOU may be eligible to take part in this clinical study if you meet the following conditions:

- ◆ Healthy men and women 18-65 years old.
- ◆ Females must be permanently surgically sterile or post-menopausal for 1 year
- ◆ Average weight for height (BMI 18-32).
- ◆ Not taking any medications or herbal remedies or supplements.
- ◆ No history of gastrointestinal surgical operations including removal of the gallbladder.
- ◆ No history of any drug sensitivity or allergy.
- ◆ No history of drug or alcohol abuse for 6 months.
- ◆ Non-user of tobacco for at least 6 months.
- ◆ No blood or blood product donation after August 12, 2021.
- ◆ No other study participation after September 07, 2021.
