The health and safety of volunteers and employees is our priority. We have safety protocols in place to keep the unit as safe as possible.

Sugarplum

Check In: Tuesday, 14 June 2022

Study drug and design:

AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority and is not currently available on the market. The objective of this study is to determine the bioavailability (the amount of drug absorbed into your blood) when comparing the investigational drug with different formulations when given with food and or fasting.

Minimum Subject Selection Criteria:

YOU may be eligible to take part in this clinical study if you meet the following conditions:

- ◆ Healthy men and women 18-60 years old.
- ◆ Females must be non-childbearing potential: permanently surgically sterile (bilateral oophorectomy, bilateral salpingectomy or hysterectomy), post-menopausal age ≤ 55 years without menses for 12 months or more without an alternative medical cause and FSH level ≥ 30 IU/L, > 55 years with no menses for 12 or more months without an alternative medical cause.
- ◆ Average weight for height (BMI 18.0-32.0 kg).
- ◆ Not taking any medications or herbal remedies or supplements.
- ◆ No history of gastrointestinal surgical operations including removal of the gallbladder.
- ◆ No history of any drug sensitivity or allergy.
- ◆ No history of drug or alcohol abuse for at least 6 months.
- ◆ Non-user of tobacco for at least 6 months.
- ◆ No blood or blood product donation after x 8 weeks or 19 April 2022.
- ◆ No other study participation x 30 days or 14 May 2022.
- ◆ Must be 6 weeks away from last first in human study.
