Rooster
Check In: No Confinement

Study drug and design:

A non-drug study in healthy volunteers is being conducted to evaluate and assess the pain and leakage of subcutaneous injections performed by an autoinjector at two injection sites (thigh and abdomen). No drugs will be administered, and no blood draws will be taken as part of this study.

Minimum Subject Selection Criteria:

YOU may be eligible to take part in this clinical study if you meet the following conditions:

- ◆ Healthy men and women 18 to 65 years old.
- ◆ Women who are not pregnant, breastfeeding, or considered becoming pregnant during the study.
- ◆ Average weight for height (BMI 18.0 to 32.0).
- ◆ Not taking any medications or herbal remedies or supplements with the exception of contraceptives or hormonal replacement therapies for females, on regular basis.
- ◆ No taking any analgesics, NSAIDs, steroid medications, or any other substances taken internally or via topical administration which may interfere with pain assessment within 7-days prior to the study device use.
- ◆ No history of any drug sensitivity or allergy.
- ◆ No history of drug or alcohol abuse for 6 months.
- ◆ Non-user of tobacco for at least 6 months.
- ◆ No treatment with any investigational drug within 30 days prior or 5 half-lives of drug if known prior to study device use.
- ◆ No drug by injection or vaccine within 30 days prior to study device use.
- ◆ No history of IV drug use.
- ◆ No history of bruising easily, bleeding disorders, thrombocytopenia, or hypo-coagulation disorder.
- ◆ No history of fragile or easily damaged skin.
- ◆ No history of extreme and irrational fear of needles.
- ◆ No history of extreme sensitivity or insensitivity to injection pain.
- ◆ No injuries, scarring, tattoos piercings, moles on designation areas (abdomen and thigh).

Screenings at ACPRU in Grayslake

Screening dates: *(To find out if you are suitable to take part in this clinical study)*

- ◆ Ongoing. June 2022 through August 2022. **Additional screening dates may be available.**
- ◆ Screening appointments are between the hours of 0800 and 1100 and take approximately 3 hours.

Stipend:

AbbVie Clinical Pharmacology Research Unit

Information Sheet

www.abbviephase1.com

- ◆ **Screening:** \$75.00. (No compensation if urine drug/alcohol/cotinine screen is positive or if BMI is out of range.)
- ◆ **Study:** Compensation of up to \$525.00 may be provided if selected and you complete the study.

Study dates: *(Please note that these dates and times are subject to change)*

Must complete the follow up phone call visit.

NOTE: Afternoons in June 2022 through August 2022. There is no confinement in this study. You will have one follow up phone call approximately 24-48 hours after injection.

(Please note that these dates and times are subject to change)

Please call our recruiting office at 1-800-827-2778 to schedule an appointment.
