

## Psoriasis Patients

### **Study drug and design:**

AbbVie is studying the differences in gene expression between normal and psoriasis skin and blood and the effects of potential new drugs on cultures generated from these samples. This study requires a skin biopsy.

### **Minimum Subject Selection Criteria:**

*YOU may be eligible to take part in this clinical study if you meet the following conditions:*

- ◆ Men or women 18 years old or greater, in general good health.
- ◆ Have a clinical diagnosis of psoriasis for at least 6 months.
- ◆ Some prescription medications may be allowed.
- ◆ Not allergic to lidocaine or petrolatum.
- ◆ No history of anaphylaxis.
- ◆ Not actively taking prescription anticoagulants known as blood thinners.
- ◆ No women that are pregnant or breastfeeding.

### **Screening dates:** *(To find out if you are suitable to take part in this clinical study)*
